Subject: RE: Cancel Duke Power's charge to consumers for more dirty energy

Dear Mr. Greene,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. I am forwarding your email to our Clerk's Office for processing. Your email will become a part of Docket No. 2013-59-E and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Assistant

Subject: Cancel Duke Power's charge to consumers for more dirty energy

Apr 22, 2013

South Carolina Public Service Commission

Dear Public Service Commission,

Renewable energy-- only renewable energy-- gives the Carolinas a low and sustainable-cost energy future. All other approaches add CO2 to the already overburdened atmosphere, and/or poison the environment in the long term.

And thinking about the long-term is wise planning. As climate begins to operate against us, and as population growth and industrial demands increase, we cannot blindly follow the policies of decades past. It does not require an Einstein to understand that continuing in the same behavior, expecting change, is one definition of insanity.

Accordingly, Duke Power should change course, and back quickly out of its new investments in coal and nuclear. Instead of reinstating technology of the past, Duke Power should invest (our) money in the same inexpensive renewable energy loudly celebrated by Duke Power's public relations. Such investment can only add business growth, prosperity and jobs to our region, already blessed with an abundance of solar, wind and even wave energy.

Duke Power already knows the benefits of renewable energy sources like wind and solar. Working with other multi-state power utilities, Duke could lead the way in bringing wind, solar, wave and geothermal sources into a national "smart"

power grid independent of any single renewable source. We call upon Duke Power to demonstrate real leadership for the future, at a time when we most need it.

Sincerely,

Bob Greene

South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Francisco Javier Santos Perez
